Professional Summary

- **Full Stack Developer** with **1.9+ years** experience and **7+ years in design**, building full-stack tools from franchise dashboards to portfolio platforms.
- Fast learner with strong **UI/UX instincts**, turning ideas into clean, responsive user experiences.
- Passionate about blending design and engineering to deliver smart, elegant solutions.

Technical Skills

Languages & Tools: JavaScript, TypeScript, Python, HTML5, CSS3, SQL, Git, GitHub, VS Code, Postman, Figma

Frameworks: React, Next.js, Node.js, Express, Tailwind, Shadcn UI, Appwrite, MongoDB, Firebase

Skills: REST APIs, JWT Auth, CI/CD, Agile Workflow, Responsive Design, Prompt Engineering, AI Integrations

Work Experience

Appwrite Hackathon 2025

Aug 2025 – Sep 2025

Full Stack Developer

Remote

- Built **Nomis.Life**, a custom-login portfolio site to help junior devs showcase projects.
- Created a no-code **CMS dashboard** so users can manage offerings and tags easily.
- Integrated **AI-assisted rewriting** to help users polish project descriptions with OpenAI.
- Added real-time **chat, reviews, and trending feed** to boost user engagement.

Blue Bird Haus Sushi

Apr 2025 – May 2025

Full Stack Developer

Los Angeles

- Built a full-stack site to give the restaurant a modern online presence with dynamic content.
- Created a custom **CMS dashboard** so staff can update menus and gallery without dev help.
- Improved mobile UX by compressing images and adding lazy loading, cutting load time by 1.2s.
- Enabled full content control for staff, now supporting 100+ monthly site visitors.

TripleTen CodeJam Hackathon

Mar 2025 – Mar 2025

Team Lead, Full Stack Developer

Remote

- Led a team of **4 devs** across time zones to build a full-stack **Eco Tracker** app in one week during the **CodeJam**
- Created **Figma wireframes**, managed GitHub workflow, and integrated **frontend/backend** with clean UI
- Set up full **CI/CD with GitHub Actions** and deployed app to a **custom domain** for live production

Projects

Franchise Performance Dashboard | Website | Source Code

Next.js | TypeScript | Tailwind

- Developed a responsive financial dashboard using **React**, **Tailwind**, and **Appwrite** to calculate profits and expenses
- Adopted by **15%+ franchise owners**, generating real-time charts for better business decisions

Crypto Dash | Website | Source Code

Next.js | TypeScript | Tailwind

- Designed responsive **Crypto Dash** frontend UI fetching live data from the **CoinGecko API**
- Implemented interactive charts and **real-time price tracking** with user-friendly layout

Brew Route | Website | Source Code

Next.js | TypeScript | Tailwind

- Built a Coffee Finder web app using the **Google Maps API** to search nearby cafes by tag and place type
- Integrated dynamic filtering by coffee type and location, with real-time map markers and UX-friendly layout

Education

TripleTen Software Engineering Bootcamp

Graduated: Feb 2025

Certificate in Full-Stack Software Engineering

Remote

University of Computer Studies, Yangon

Graduated: May 2019

Diploma in Computer Science

Yangon, Myanmar

- Graduated with Distinction — **GPA: 3.76**
- Relevant Courses: Software Engineering Practice, **Applied Machine Learning**, Operating Systems, Model-Based Programming, **Algorithms and Data Structures**, Intro to **Software Engineering**, **Computer Architecture**
